Maxiforce and AERA Announce the Release of the Failure Analysis Manual

May 12, 2009

By aftermarketNews staff

The manual can assist in the identification of engine failures; help machine shop trainees better understand root causes for engine failure; and assist machine shops in warranty claims, potentially saving machine shops money.

DORAL, FL — Maxiforce, celebrating its 15th anniversary as a leader in diesel engine parts, and the Automotive Engine Rebuilders Association (AERA), have announced the release of the Failure Analysis Manual. This user-friendly manual will help machine shop owners and their customers identify the root cause of engine failures. Machine shop owners and their customers will find many benefits to this manual, according to Maxiforce and AERA.

The manual can assist in the identification of engine failures; help machine shop trainees better understand root causes for engine failure; and assist machine shops in warranty claims, potentially saving machine shops money.

"We are happy to have partnered with the AERA on this educational manual," said Paul Kelly, sales and marketing director for Maxiforce Inc. "With its vast knowledge and experience the AERA has created a very useful and beneficial tool. We are certain that our customers and fellow AERA members will benefit from this manual."
